

Welcome to the pcmtuner installation guide

Preparation before installation:

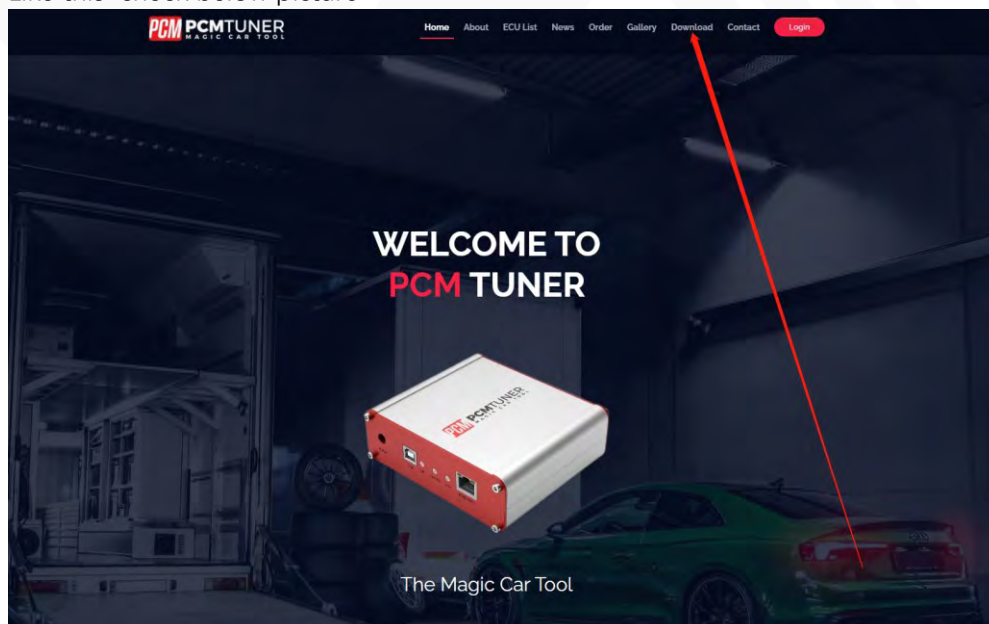

1 Connect the device to the computer with power cable and USB cable, and plug the smart lock dongle into computer, like what I show you here .

2 Close all anti-virus software and firewall on the computer (the system firewall should also be closed. According to the system and software, Google how to close it if you dont know how to handle.)

3 Go to <http://tuner-box.com> download tool software

Like this check below picture

4 unzip the downloaded software check below

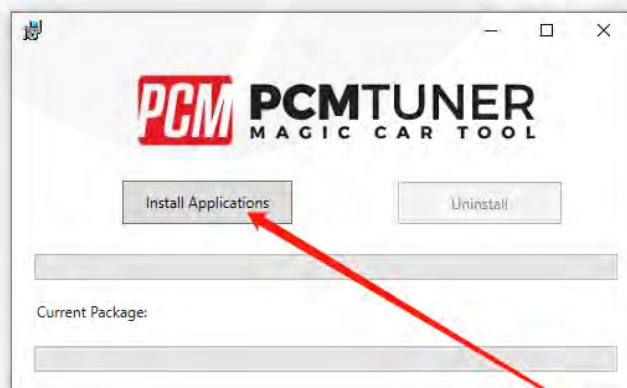

Name	Date modified	Type
PCM_Setup	02.03.2022 18:58	360压缩

5 then you will get 3 files like below

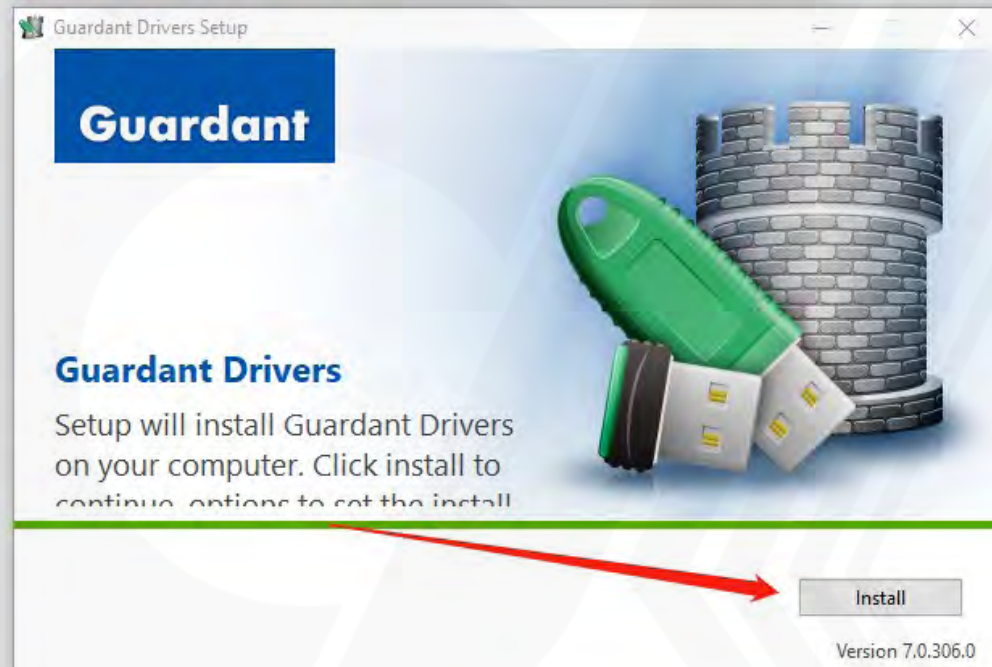

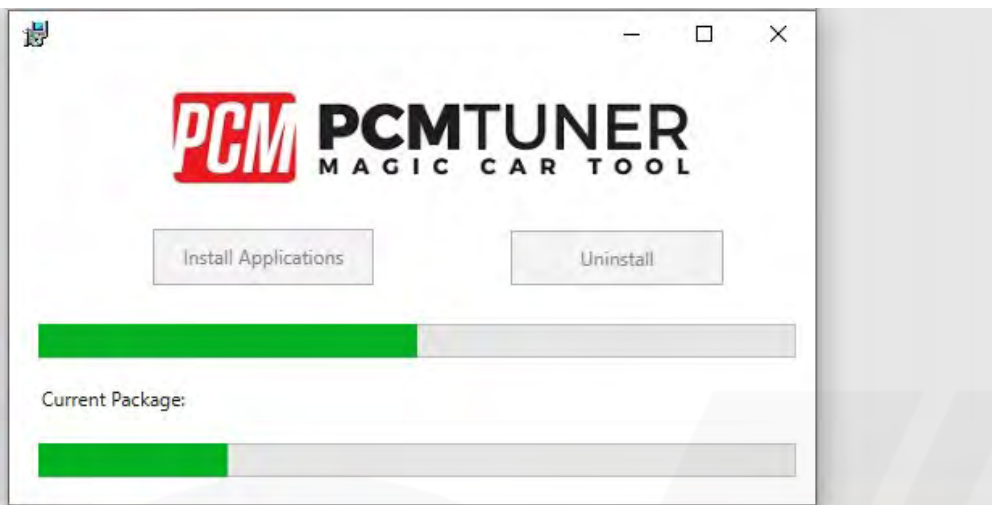

Name	Date modified
Notice	01.03.2022 11:56
PCM_Setup	02.03.2022 17:40
VZperformance	02.03.2022 18:56

Hmmm,you need read the notice before start install all software

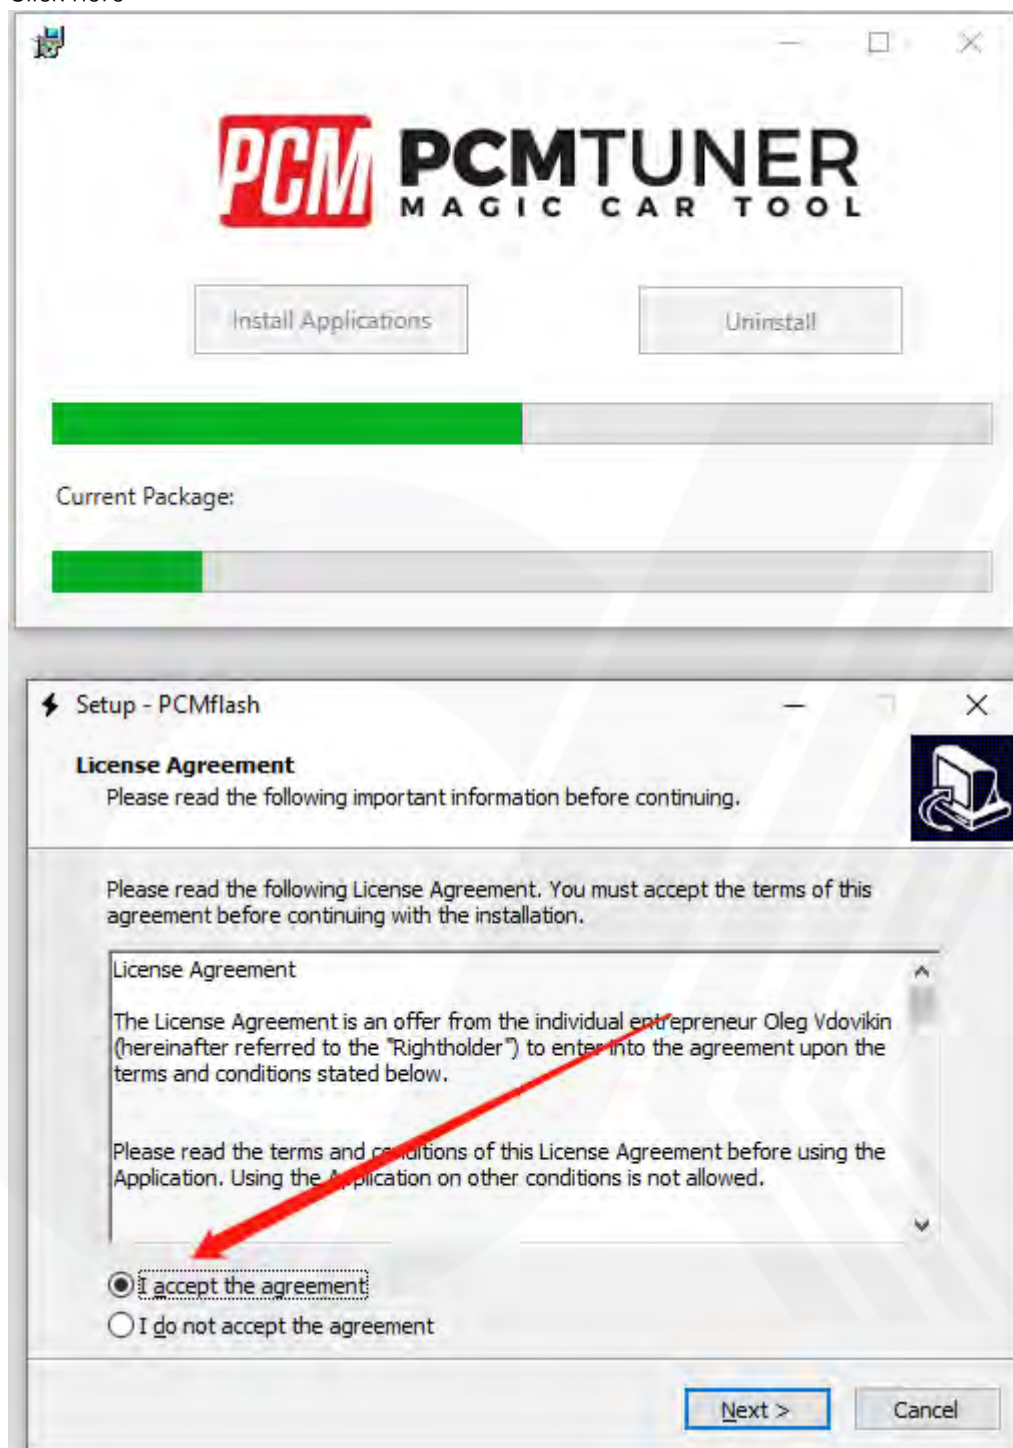

Then click PCM_Setup run it like below

Click here

Click here

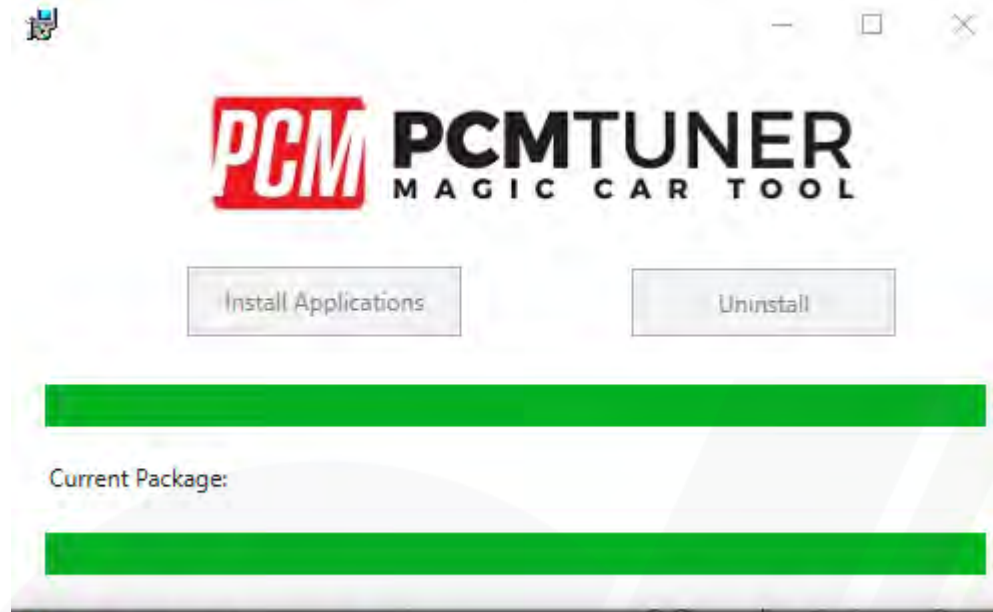

Then next till display below picture ,but don't run it, un select the run software

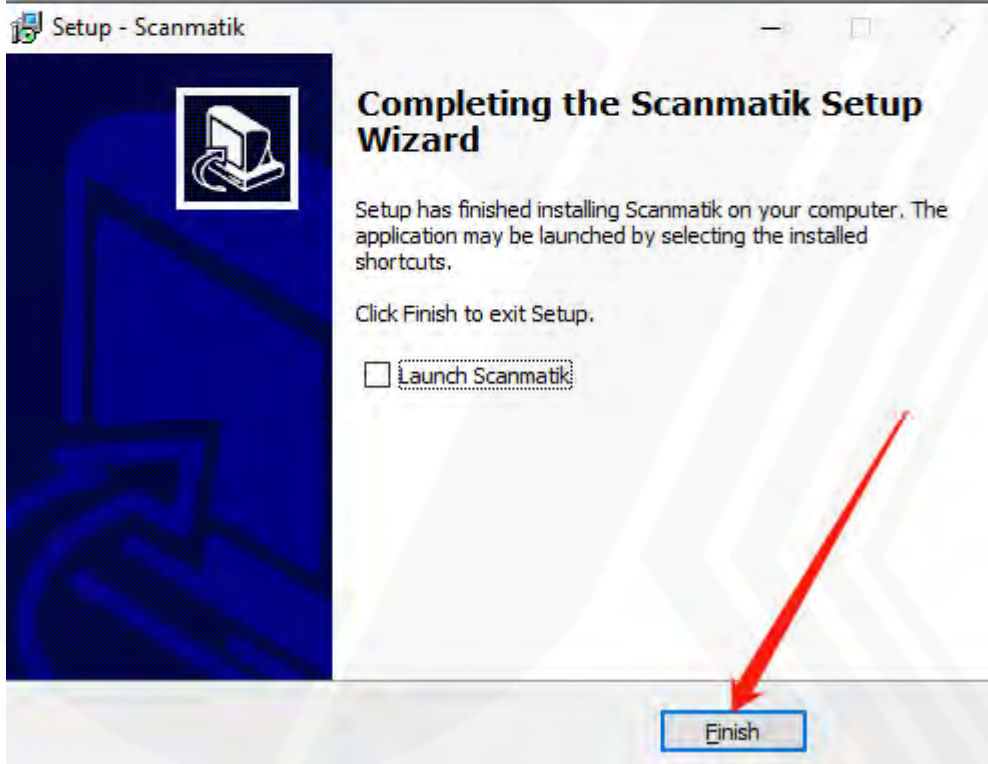

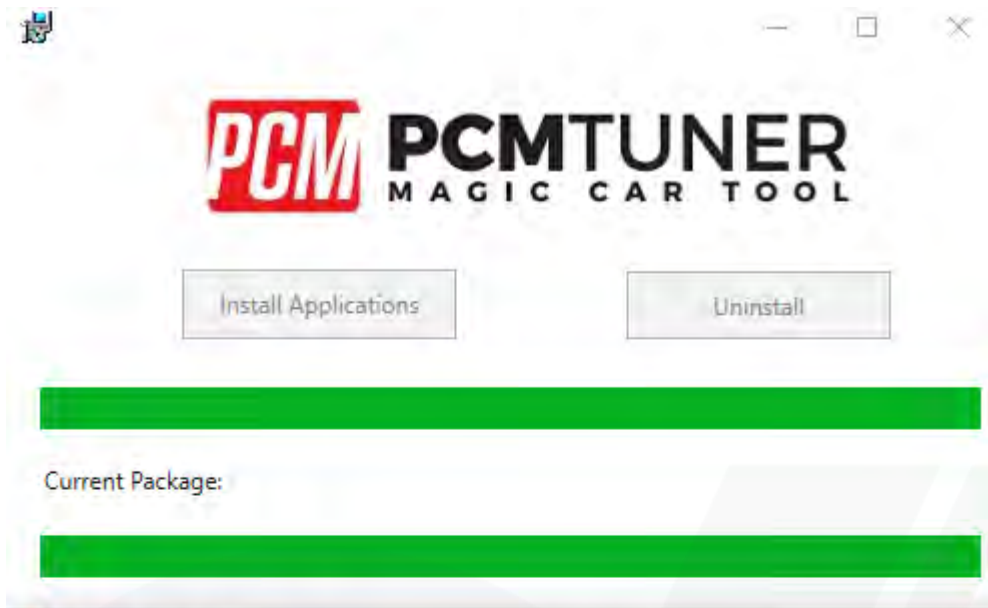

Notice , never select lauch software

Continue click here

Till happen this

So cool

When you see below things happen ,that's mean you already completely install tool software

Pls read the carefully what the software tell you

When you finish install , then run PCMtuner software
And register it like below
